- Silis subspinosa* PIC. Naturaliste XXXII, 1910, p. 259, to the genus *Laemoglyptus* FAIRM. This species has erroneously been transferred to the genus *Silis* by CHAMPION (Ent. Month. Mag. LXII, 1926, p. 205).
- Ichthyurus zehntneri* GESTRO, Notes Leyden Mus. XIX, 1897, p. 129, to the genus *Microichthyurus* PIC. *M. basiciliatus* PIC, Echange LIII, 1937, hors-texte p. 145, most probably is a synonym of *zehntneri* GESTRO.
- Malthodes bisbinotatus* PIC. Echange XLII, 1926, p. 4, to the genus *Falsomalthodes* PIC. *Falsomalthodes* has been described as a subgenus of *Malthodes*, but it is no doubt a distinct genus. The simple structure of the male abdominal segments and the swollen apices of the elytra are sufficiently characteristic to justify its generic separation from *Malthodes*.
